Claim Rejection under 35 U.S.C. 112, 1st paragraph

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claim 3 is rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for derivatives disclosed in instant specification, does not reasonably provide enablement for derivatives not named in the specification. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make / use the invention commensurate in scope with these claims. Applicant does not use language such as --- By derivatives we mean ---. Examiner suggests that Applicant write claims using Markusk language.

Claim Rejections under 35 U.S.C. 112, 2nd paragraph

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 3, 4 and 6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
5. The term "derivative" in claim 3 line 3 is a relative term which renders the claim indefinite. The term "derivative" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be

reasonably apprised of the scope of the invention. See Examiner's reasoning in 35 U.S.C. 112, 1st paragraph rejection above.

Claims 4 and 6 contain the trademark/trade names Angiostatin and Endostatin. Where a trademark or trade name is used in a claim as a limitation to identify or describe a particular material or product, the claim does not comply with the requirements of 35 U.S.C. 112, second paragraph. See *Ex parte Simpson*, 218 USPQ 1020 (Bd. App. 1982). The claim scope is uncertain since the trademark or trade name cannot be used properly to identify any particular material or product. A trademark or trade name is used to identify a source of goods, and not the goods themselves. Thus, a trademark or trade name does not identify or describe the goods associated with the trademark or trade name. In the present case, the trademark/trade name is used to identify/describe anti-angiogenic substances and, accordingly, the identification/description is indefinite.

Other Matters

Examiner's Suggestion:

In claim 2 line 1, and claim 2 line 4 delete "including" and insert --- comprising ---.

Allowable Subject Matter

Claims 1,2,5,6 are allowable. The prior art does not teach or suggest the method comprising a lithium salt of a polyunsaturated fatty acid.
